Transportation of Students

3541.9

Maintaining a Safe Environment on School System Vehicles

The safety of the students while at bus stops or while being transported can be affected by student behavior. Pupils shall be informed of the rules and regulations for bus transportation through their individual schools. To assure, where possible, the maximum safety of students involved with the school transportation system, the following guidelines have been instituted. The Vernon School Board does not imply that school transportation safety measures are limited to those listed.
